

VMware - Nexus 1000V

1 Day Outline

INTRODUCTION

V2.4

The vSphere suite of products consisting of: ESX Server 4.0, vCenter 4.0 and VMware Consolidated Backup, is both exceptionally powerful and comprehensive. Our Nexus 1000V course is intended for students with strong networking experience. It is our intention to take your existing knowledge base and expand upon that. At course competing the student will be able to configure, support configure security policies, effectually troubleshoot the Nexus 1000v and more.
